

Ohio University College of Osteopathic Medicine (OU-COM)
Centers for Osteopathic Research and Education (CORE)
Osteopathic Family Medicine 1 (OCOM 819)
Year 3 Family Medicine Clerkship

Appendix B

Skills and procedures you may expect to observe, assist or conduct during your clerkship. You must log all procedures using New Innovations.

Comprehensive Hx (new admit/new patient)	Excision, skin lesion	Lumbar puncture
Patient education	Fetal heart auscultation during labor	Mini-Mental Status Exam
Comprehensive PE (new admit/new patient)	Fetal monitor Placement (external)	Nasal packing
ABG interpretation	Fetal monitoring interpretation	Nerve conduction studies
Administration of blood and blood products	Foreign body removal ear	Newborn evaluation
Airway management/intubation	Foreign body removal eye	Newborn resuscitation
Apgar score	Foreign body removal nose	NG tube placement
Arterial Catheter Insertion	Foreign body removal skin	OMT
Arterial puncture	Foreign body removal throat	Osteopathic Exam
Arthrocentesis	Fracture reduction	Pap smear
Biopsy procedures (punch and shave)	Functional assessment of elderly (ADL/IADL)	Pelvic examination
Bladder catheter insertion (Foley)	Glucose by fingerstick	PFT interpretation
Breast examination	Hearing test	PPD interpretation
Cast application	Hemocult	Prenatal Exam
Cast removal	Hernia exam	Prescription writing
Circumcision	Imaging CT	Rectal exam
CPR	Imaging MRI	Sigmoidoscopy (flexible)
cryosurgery	Imaging x-ray	Sigmoidoscopy (rigid)
Culture, blood	Immunizations	Slit lamp exam
Culture, sputum	Incision and drainage of abscess	Splint application
Culture, stool	Incision closure	Splint removal
Culture, throat	Induction of labor	Staple removal
Culture, urine	Injection, Intradermal	Steri-strip application
Culture, vagina	Injection, intramuscular	Suture removal
Culture, wound	Injection, intravenous	Taping procedure for sprains etc.
Diaphragm fitting	Injection, joint	Tonometry
Direct ophthalmoscopic exam	Injection, subcutaneous	Tympanometry
Ear lavage	Insertion of peripheral IV	urinalysis (dipstick and microscopic)
Ear, Cerumen removal	KOH/Wet mount	Vasectomy
EKG	Labor and delivery	Venipuncture (for blood sampling)
EKG interpretation	Laceration/wound stapling	Visual acuity/visual field testing
Episiotomy	Laceration/wound suturing	Wart Removal
