

BEHAVIOR & DEVELOPMENT QUESTIONS  
WHERE TO TURN?

## WHEN PARENTS ASK ....

Why isn't she talking yet?

Why can't he get along with others at day care/preschool?

Could it be autism?

Does my child have ADHD?

Do young children need mental health services?

Will I have to give my child medication?

# FAMILY NAVIGATOR PROGRAM

The Family Navigator Program is designed to empower parents and caregivers to participate in health care decisions. Our goal is to foster an increased understanding of medical, mental health and educational information by:

- Explaining diagnostic reports
- Recommending appropriate services
- Finding treatment providers
- Reducing barriers to care.

The Family Navigator Program provides parents of young children with the information they need to make decisions about their child's behavioral health and developmental care.

Helping families access services for young children in our community.
